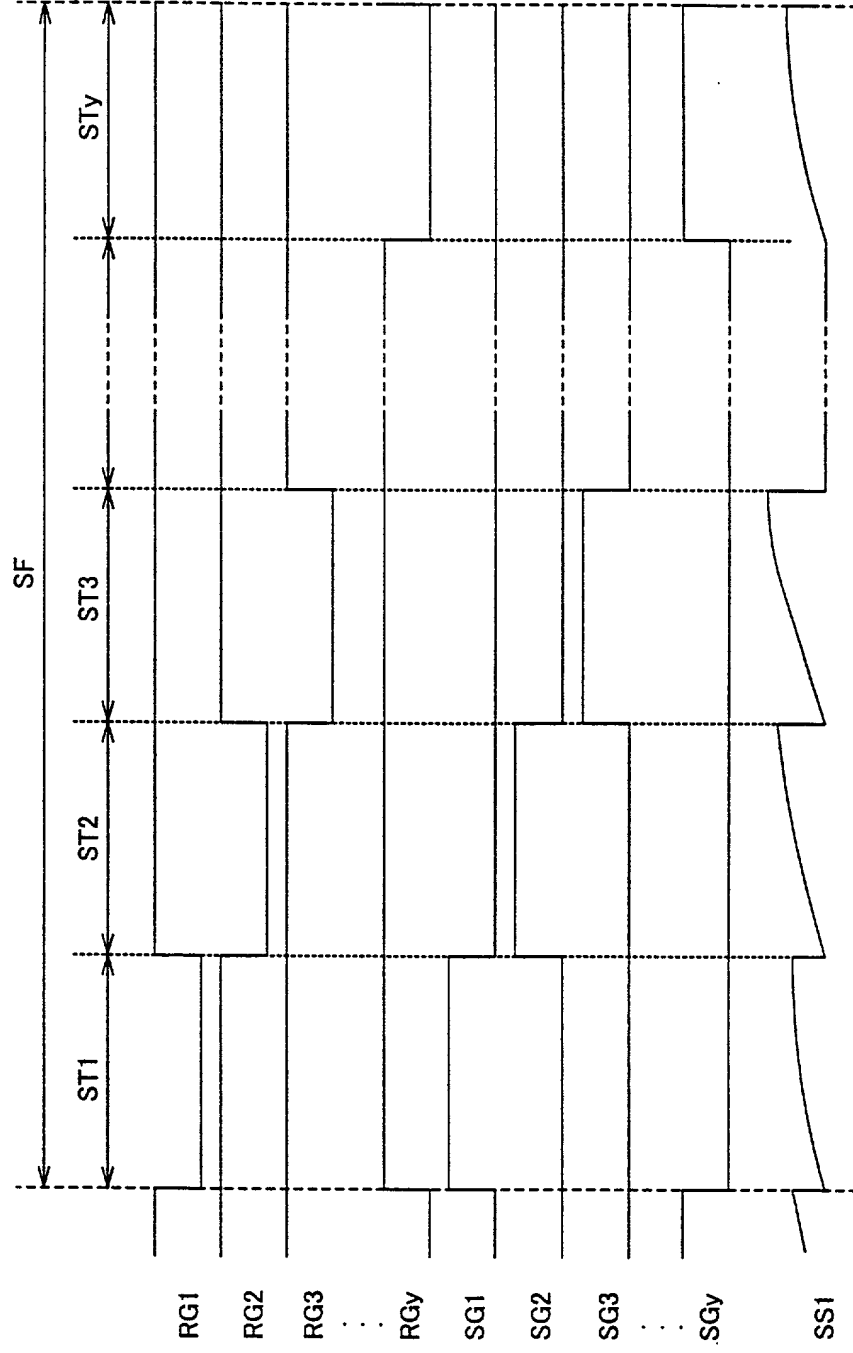

Fig. 3

Figure 4 is a schematic diagram of a color calibration method. The diagram shows a grid of color patches arranged in rows and columns. The rows are labeled with color names (e.g., RG1, RG2, RG3, ..., RGy, SG1, SG2, SG3, ..., SGy) and the columns are labeled with color names (e.g., ST1, ST2, ST3, ..., STy). The grid is divided into three main sections: a top section labeled 'SFr', a middle section labeled 'SFg', and a bottom section labeled 'SFb'. The total width of the grid is labeled 'SF'. The grid is also divided into three main sections: a left section labeled 'R', a middle section labeled 'G', and a right section labeled 'B'. The total height of the grid is labeled 'SFb'. The grid is also divided into three main sections: a top section labeled 'ST1', a middle section labeled 'ST2', and a bottom section labeled 'ST3'. The total width of the grid is labeled 'SF'. The grid is also divided into three main sections: a left section labeled 'ST1', a middle section labeled 'ST2', and a right section labeled 'ST3'. The total height of the grid is labeled 'SFb'.
